

*Thuja occidentalis* 'Mirjam'

The most characteristic feature of *Thuja occidentalis* 'Mirjam' is its striking yellow foliage in summer. In winter 'Mirjam' turns to orange and bronze-green. 'Mirjam' is a beautiful sphere of about 2 ft (60 cm) and is fully hardy.

EU26051

*Thuja occidentalis* 'Golden Anne'

*Thuja occidentalis* 'Golden Anne' is a fast growing pyramid to egg-shaped conifer. It was found as seedling between other *Thuja* species. 'Golden Anne' has a stable yellow color which changes only slightly in winter. 'Golden Anne' does not suffer from sunburn and is very hardy.

EU applied for 2011/0655

Van Vliet New Plants is specialized in introducing and managing new plants, protected by plant breeders rights (PBR) and has agencies all over the world.

*Thuja*

*Thuja plicata* 'Little Boy'

**T***huja plicata* 'Little Boy' has a spherical to oval growth habit. For this conifer, the name 'Little Boy' was chosen for a reason. It has a compact growth habit and is approximately 3 ft (1 m) high. The foliage of 'Little Boy' is yellow-green in summer and changes in winter to warm orange-bronze. 'Little Boy' is a slow grower and ideal for small gardens. It is a perfect and healthy alternative to Buxus hedges.

EU applied for 2009/1617

*Thuja occ.* 'Janed Gold'  
PBR GOLDEN SMARAGD®

**G**olden Smaragd is similar in habit to the green 'Smaragd', but has beautiful golden needles. It grows in a densely branched narrow conical shape. Golden Smaragd is a robust hardy plant that does not suffer from sun burn. Golden Smaragd likes a spot in the sun or semi-shade.

Van Vliet New Plants manages only the Dutch rights of this plant  
EU24245 'Janed Gold'

*Thuja occidentalis* 'Golden Brabant'

**G**olden Brabant is a beautiful golden-yellow version of the famous *Thuja occidentalis* 'Brabant'. It is a fast growing *Thuja* not bothered by sun burn. 'Golden Brabant' is a perfect yellow conifer, ideal as a hedge, but also very beautiful as a solitary plant.

EU applied for 2011/1060

*Taxodium distichum* 'Cascade Falls'

**T**he deciduous conifer *Taxodium distichum* 'Cascade Falls' is a weeping swamp cypress from New Zealand. The branches of 'Cascade Falls' hang down heavily and since it is a strong grower, branches of up to 3 ft (1 m) long can be formed in a year. 'Cascade Falls' is therefore usually grafted on a longer trunk. The needles of 'Cascade Falls' are bright green and soft. They contrast well with the reddish-brown hanging branches. In autumn the needles turn to orange and orange brown for several weeks. Finally, in winter 'Cascade Falls' drops all its needles.
